1. Project Overview

a. Project Summary

6-12 Food Stores owns and operates over 600 food stores in the Mid-Atlantic & Florida region. Currently, customers can go to the sixtwelve.com website and download a PDF with full nutritional information. However, this is not an ideal user experience. 6-12 would like to provide customers with a *meal builder* online. This *meal builder* should provide an interactive, easy to use interface for accessing nutritional information.

b. Business requirements

Business Requirement number	Requirement	Priority (High, Medium, Low)
BREQ-1	Customers must be able to build meals in the same (or similar) manner as ordering in the store	High
BREQ-2	All sizes for items must be available	High
BREQ-3	Images for all food items must be displayed	Medium
BREQ-4	A category image should be displayed for each category (e.g. smoothies)	Medium
BREQ-5	Allergen statements should be displayed	Low
BREQ-6	Market specific nutritional information must be displayed (e.g. Florida specific foods)	High
BREQ-7	Output should mirror U.S. FDA Nutritional Information label format	Medium
BREQ-8	Link to nutritional information must be included in the main navigation of the sixtwelve.com site.	High
BREQ-9	Nutritional information should be administered through a web interface or loaded from internal menu system.	High
